

Proposed Alberta Environment Approval Amendment

Request for Time Extension

The Town is requesting the following changes to the EPEA Approval 1242-02-00:

- **Section 3.3.1**

“On or before October 1, 2011, the Approval holder shall submit a complete amendment application to upgrade the waterworks system, if the assessment in Section 3.1.5 indicates an inability to meet the performance standards set out in the Standards and Guidelines Document.”

Request:

Change date of October 1, 2011 to December 31, 2012.

- **Section 3.3.3**

“The approval holder shall complete the upgrade of the waterworks system on or before October 1, 2013.”

Request:

Change date of October 1, 2013 to December 31, 2014.

Why?

- Town is currently in discussions about a Regional Water System. If this proceeds, additional upgrades would be required, different than if Town goes alone.
- Additional time would allow for better planning and coordination of the regional initiative and sufficient time to investigate the upgrade requirements.
- The proposed dates are similar to those required by AENV for plant upgrades in Black Diamond (a member of the potential regional system).
